

KEY FACTS

Investment Objective

The Fund's objective is to generate investment returns by investing in companies that are focused on the growth in consumption and services in emerging markets. The portfolio provides exposure to this philosophy through active stock picking based on a fundamental bottom-up approach with disciplined analytics and an awareness of macro factors. The focus is on growth companies, which are domiciled, or carrying out the main part of their economic activity, in an emerging market country. The Fund is suitable for investors seeking long term capital appreciation.

MANAGER'S COMMENTARY

It has been a strong month with the net asset value rising by 4.7% as world stock markets have begun to take a more sanguine view to the threats to the world economy from US trade tariffs. It has also been helped by some very good first quarter corporate results from across the portfolio. This result compares adequately well to the rise of 4.3% in the MSCI Emerging Market Index.

In India, the fourth quarter results season drew towards a close with excellent figures from **Bharti Airtel**, the country's leading mobile telephone operator. For the year, revenues grew by 12.9%, with net profit 14.8% ahead. **Bajaj Finance**, the country's largest consumer finance provider grew sales by 21%, while **InterGlobe Aviation**, India's now dominant airline, easily beat consensus forecasts with net profit 62% higher, while continuing to grow market share.

In South East Asia, Sea Ltd reported sales growth of 30% in the first quarter, together with an expanded ecommerce take rate, a good rebound in gaming, and a rapid expansion in digital finance. In the wake of this tsunami of good news, the shares rose 19.6%.

In China, both **Tencent** and **Xiaomi** reported good results, but in both cases the good news was apparently already priced in, and neither share moved much. In the latter's case, it has, in fairness, had a spectacular year so far, but these results suggest there is more to come. Share gains in mobile phones, home appliances (Internet of Things, as they call them) continue and the imminent launch of their second EV, and first SUV, the YU7, bode well for the second half.

BYD's similarly spectacular run continued early in the month before they announced dramatic price cuts across their range, particularly at the lower end, which caused something of a correction, and no doubt some panic among their competition. Further falls in costs, notably Lithium, and their already huge cost advantage allows them to do this. We expect more market share gains ahead for **BYD** as the sector consolidates.

Economic data from India confirmed two key positive trends. GDP growth for the fiscal Q4 to March rebounded back over 7%, confirming that the soft patch witnessed in the autumn is over. In addition, inflation continues to ease with the headline number heading below 3%, driven by lower food prices, as India's agricultural miracle unfolds, no doubt supported by more use of **Mahindra & Mahindra** tractors. Lower Oil prices continue to help both of these economic parameters. This is likely to see more easing by the Reserve Bank and bodes well for the Indian stock market over the rest of the year.

Given the strong rebound in markets since the postponement of the "Liberation Day" tariffs, a quieter spell would not go amiss, or be surprising, but there are good reasons, including those mentioned above, why Emerging markets will continue their renewed outperformance.

RISK STATEMENT

The Fund may experience the following risks:

Emerging market risk: Exposure to emerging markets assets generally entails greater risks than exposure to well-developed markets, including potentially significant legal economic and political risks. Other factors include greater liquidity, counterparty and volatility risks, restrictions on investment, settlement disruption and difficulties valuing securities.

Currency risk: The Fund invests in assets which are denominated in currencies other than the base currency of the relevant Share Class. Accordingly, the value of such assets may be affected favourably or unfavourably by fluctuations in currency exchange rates.

China: Investments in China A-shares through the Stock Connect Scheme involve specific risks.

The list of risks is not exhaustive. For further information on risks, please refer to the Fund prospectus (in English). The Fund's Risk and Reward Profile is detailed in the KIIDs (for UK-based investors, in English), and the Risk Indicator is provided in the PRIIPS KIDS (for investors based in registered European countries, in English or German).

The risk indicator assumes you keep the Product until maturity end of the recommended holding period (7 years). The actual risk can vary significantly if you cash in at an early stage and you may get back less. The summary risk indicator is a guide to the level of risk of this Product compared to other products. It shows how likely it is that the Product will lose money because of movements in the markets or because we are not able to pay you. Risk Category 5 reflects high potential gains and/or losses for the portfolio. The capital is not guaranteed.
